## PREFACE

The Type Catalog is a complete source of all typebar, keybutton, element and font part numbers, including ordering information for special type customer elements and custom fonts. This catalog consolidating all of this information, was created to provide one source of reference information for this area of OPD products.

This catalog will be referenced in all applicable Parts Catalog contents and Part/No. Price Lists.

This catalog will be reviewed periodically and revised whenever necessary.

Prices for parts listed in this catalog can be found in the General Parts Price List, F/N 241-5111 or the appropriate product Parts Price List.

## TYPEBAR TYPEWRITERS

### SUBJECT: ORDERING TYPEBARS AND KEYBUTTONS FOR TYPEBAR TYPEWRITERS

**PURPOSE:** To provide information relative to the ordering of typebars and keybuttons.

**INFORMATION:** All typebars are classified in two categories — "Regular Maintenance Parts" or "Special Character Typebars".

**Regular Maintenance Parts:** Includes all the typebars for Standard and "Executive" Typewriters that have individual part numbers assigned by position. The most commonly used special character typebars also have assigned part numbers for certain positions.

Typebars with assigned part numbers should be ordered as all other maintenance parts on a Parts and Supplies Requisition, F/N 140-3745. Only the part number, name (typebar), and quantity need to appear on the order since the typestyle, position, character, and catalog number are defined by the assigned part number.

If these typebars are required on an emergency basis, they should be ordered by the assigned part number from the parts center in your area.

This catalog includes the individual part numbers for the associate keybuttons in the available color ranges for all typebar typewriters. The keybuttons should also be ordered with regular maintenance parts.

Keybuttons for the commonly used special character typebars for A-B-C-D models are stocked in the parts centers for emergency requests, and are to be ordered by the assigned part number. Most of the standard keybuttons are also stocked in the parts centers.

The "Special Character Typebar" category (which includes all changeable typebars) requires the use of a blanket part number, a catalog number, and full specifications when ordered. Special character typebars are not listed in this catalog. The reference source for the typestyle, catalog number and character design is in the Type Available Catalog.

**ORDERING PROCEDURE — SPECIAL CHARACTER TYPEBARS:** Complete information must be provided in the designated area on the Special Type Order Form No. 14-3379, in the following format, to enable the plant to process your order. (Copies must be legible.)

## TYPEBAR — GENERAL INFORMATION

Only EMERGENCY orders for special typebars should be submitted over the IBM ITPS network. The wire order should follow the same format from left to right as outlined on the Special Type Order F/N 140-3379. This eliminates order cancellation due to improper or omission of data. Special typebars ordered emergency are scheduled for shipment 48 hours after the order is entered at Lexington.

**DO NOT PHONE** for special character typebars.

Special character typebar emergency orders for maintenance needs will be shipped by the Lexington Parts Center to a "special address" provided the full name and address of the Customer Engineer is outlined on the order. To provide adequate control and to assure completion of the order, special character typebars will not be shipped directly to a customer unless the order qualifies to be submitted on a Direct Customer Order F/N 140-4471.

The lower portion (Section E) of the Special Type Order Form applies only to Branch Office instructions and does not affect processing at the plant.

**SET OF TYPE:** Use the Special Type Order F/N 140-3379 for ordering sets of type.

To order a set of type, fill in data across top of form to specify:

### SECTION A:

1. Date, Branch Office Name and Number (self-explanatory).
2. Customer Name can be noted for Branch Office reference (not needed for plant processing).
3. B.O. Requisition Number — Four digit reference number.
4. Model and Serial Number — For Branch Office identification only, not needed for plant processing.
5. Indicate number of pages of this order.

### SECTION B:

6. Within section entitled "Sets of Type", specify one of the blanket part numbers listed below for type sets with or without segment:

	With Segment	Without Segment
A. Model 01	1018251	1019474
B. Model 04	1067633	1067632
C. Model ABC (Ground)	1271102	1077094
D. Model ABCD (Unground)	*1268332	*1268331
E. Model D Center	1188872	1188871
Underscore Pos. 23		
F. Optical Scanning:	1271894	1271895
Alpha-Numeric		
G. Optical Scanning:	1271896	1271897
Numeric		

\*Specify the model, such as A, B, C, or D for unground sets of type. Write the letter describing the model within the "Model" block of Section A. Geometry typebars will be furnished in the unground set of type only when Model D is specified.

When a complete set of type with segment is required for Models A, B, C, the unground set (Blanket P/N 1268332) is recommended. The more common typestyle in these sets are already made up at the plant, which will expedite shipment. If customer uses changeable bars, this situation should be considered before ordering the unground set.

7. Check "with segment" or "without segment" in this block to verify that correct blanket part number was designated.
8. Specify style of type.
9. Quantity — Number of sets desired of this particular blanket part number and typestyle. A separate order form must be submitted for each different blanket part number and/or style of type ordered.
10. Keyboard Arrangement — Such as 01, 03, 33, etc.

**NOTE:** The Model C & D keyboard arrangements are illustrated in this catalog.

11. Number of Characters — Such as 84, 86, 88.
12. Check if set is to contain hardened bars.
13. Check if exceptions (substitute for regular typebar) in any position are necessary.

**NOTE:** Whenever special numbers or other special characters are required within sets of type (substitutes for standard typebars), the individual numerals or other characters are to be listed in the Special Character Typebar Section (Section C) of the order form. Specify the position number, the type available catalog number, and the symbol. Check if changeable or dead key is necessary for a given position. Designate keybutton requirement if needed to match substituted typebar by checking the keybutton column and giving the keybutton blanket part number.

An 86-character keyboard arrangement may be ordered as an 88-character arrangement by specifying the type character(s) desired in the zero position. When substituting characters, analyze the width of each one to ensure that it will fit into the type basket in the desired position without interfering with adjacent typebars.

The plant will not supply a GROUND typeset for any Model D keyboard arrangement.

Follow the instructions for ordering the special keybuttons as outlined above under "Special Keybuttons". The substitution of the "special" for the standard keybutton is made when the shipment is received at the Branch Office.

**ABA COMMON LANGUAGE TYPE AND OPTICAL SCANNING TYPE:** To order ABA or Optical Scanning typebars, sets of type, or type slugs, follow the same procedures as outlined in this catalog for special character typebars, slugs, or typesets. The blanket part numbers assigned for ABA or Optical Scanning are listed in the front of this section. The type available numbers are shown under the Character Scanning section of the Type Available Catalog. To facilitate ordering, the various styles and combinations are listed below.

**ABA COMMON LANGUAGE:** "STD" is the typestyle presently installed in plant-ordered typewriters. Typestyle "13B" was furnished between late 1959 and announcement of "STD" in early 1965. The "JG" typestyle preceded the 13B font. "UL"-typestyle was originally designed for the DP Utility Inscrber for direct imaging of documents. Field conversion from 13B to STD is not recommended. If the customer requests conversion, contact the OP Sales Engineering Department at the Lexington Plant.

**GENERAL**

**REVIEW OF ORDERS:** It is specifically recommended that all special character typebars and keybutton orders be reviewed and approved by the OP CE Manager (or the representative in charge of OP Customer Engineering Parts Operation) before they are submitted to the plant for processing. **INCORRECTLY SUBMITTED ORDERS WILL BE CANCELLED AND RETURNED**, with the notification to refer to this catalog before reordering. **ORIGINAL AND ALL COPIES OF THE ORDER FORM MUST BE LEGIBLE.**

**NOTE:** Separate order forms must be submitted to the plant to order "Spec" typebars and/or "Spec" keybuttons, F/N 140-3379.

Special character typebars and associated keybuttons for typebar typewriters are charged to Parts Inventory Account 0981.

Local stock of typebars and keybuttons should be kept at a level sufficient to cover normal maintenance service. Surplus typebars and keybuttons must be disposed of in accordance with the instructions shown in the Debit Memo section of the Branch Office Manual regarding surplus and obsolete parts.

**NOTE:** All Direct Customer Orders, F/N 140-4471, for direct customer shipments must conform to the instructions in this catalog and must meet the other requirements for direct customer shipments, as outlined in the OP Parts section of the Branch Office Manual.

Order for discontinued sets of typestyles must be submitted on a Sales Engineering Request.

# MODEL D

The following keyboard arrangements show special keyboards for specific requirements. If the type style is not available under the keyboard which the customer desires, select the keyboard in which the typestyle is available which is most similar to the keyboard desired. Determine the necessary type substitutions to the available keyboard that will change it to the keyboard desired. The customer will then be billed the appropriate charges which can be found under "Substitution of Type Characters".

**SUBSTITUTION OF TYPE CHARACTERS:** A customer may order any characters listed in our Type Available Catalog for substitution on the Model D keyboards. However, when substituting characters, analyze

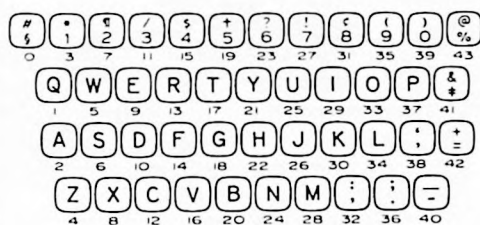

the width of each one to ensure that it will fit into the type basket in the desired position without interfering with adjacent typebars.

**TYPE DIES:** Die charges are listed in the Price Manual. Normal type substitution charges apply in addition to the die charges.

**INOPERATIVE SHIFT KEYS:** Unless otherwise specified, upper case characters will be ground off at the plant when the order specifies inoperative shift keys.

### GENERAL

**REVIEW OF ORDERS:** It is specifically recommended that all custom typing elements and special keybutton orders be reviewed and approved by the OP CE Manager (or the representative in charge of the OP Customer Engineering Parts Operation) before they are submitted to the plant for processing. **INCORRECTLY SUBMITTED ORDERS WILL BE CANCELLED AND RETURNED**, with the notification to refer to this catalog for reordering. **ORIGINAL AND ALL COPIES MUST BE LEGIBLE.**

**BRANCH OFFICE PROCESSING:** Field Administration will forward copies 1 and 2, with carbons intact to the Lexington Plant with a Direct Customer Order (DCO), F/N 140-4471, as described below.

**LEXINGTON PROCESSING:** The Lexington Plant will assign a Plant Order number to each form. The packaged elements will be shipped directly to the customer unless otherwise specified on the DCO. Lexington will return copy 2 as confirmation of shipment to the customer. No charges will be made to inventories since Lexington will bill the customer direct.

**INVOICING OF CUSTOM ELEMENTS:** Custom typing elements are to be ordered on the DCO with a Special Type Order Form attached. Two categories are applicable.

- A. Those ordered as additional or ordered to replace a custom element on a unit which is not under Maintenance Agreement. These typing elements are to be invoiced in full by the Lexington Plant from a DCO.
- B. Those ordered to replace a broken element on a lease or rental machine or on a Maintenance Agreement machine. The Lexington Plant will issue a miscellaneous invoice to OPD HQ for write-off to the cost of rentals or Maintenance Agreement Parts. A copy of the invoice marked "No Charge" is sent to the customer as a notification of the shipment of the element.

**NOTE:** Separate order forms must be submitted to the plant to order different typestyle custom elements (F/N 140-3379).

**NOTE:** Orders for the maintenance replacement of custom fonts, when the "identification" number is specified, will be entered on emergency basis by the Lexington Parts Center. Shipping schedule is two weeks after receipt of the order at the plant. Custom fonts for which an "identification" number has not been established will be shipped within eight weeks from entry of the order at the Lexington Parts Order Department.

Only EMERGENCY orders for replacement custom fonts should be submitted over the IBM ITPS network. The message should specify in sequence the quantity, blanket part number, "identification" number and the style of type. A brief resume of substituted character(s) and position should be included in the ITPS message. The same day a Special Type Order Form, F/N 140-3379 must be properly filled in and dispatched to the Lexington Parts Order Department. The form must be clearly marked as "Confirmation of ITPS message of (date)".

**DO NOT PHONE** for custom fonts.

#### **GENERAL**

**REVIEW OF ORDERS:** It is specifically recommended that all custom fonts and special keybutton orders be reviewed and approved by the OP CE Manager (or a representative in charge of OP Customer Engineering Parts Operation) before they are submitted to the plant for processing. **INCORRECTLY SUBMITTED ORDERS WILL BE CANCELLED AND RETURNED**, with the notation to refer to this catalog for reordering. **ORIGINAL AND ALL COPIES MUST BE LEGIBLE.**

**BRANCH OFFICE PROCESSING:** Field Administration will forward processing copies 1 and 2, with carbons intact, to the Lexington Plant with a Direct Customer Order (DCO), F/N 140-4471, as described below.

**LEXINGTON PROCESSING:** The Lexington Plant will assign a Plant Order number to each form. The packaged fonts will be shipped directly to the customer unless otherwise specified on the DCO. Lexington will return copy 2 as confirmation of shipment to the customer. No charges will be made to inventories since Lexington will bill the customer direct.

**INVOICING OF CUSTOM FONTS:** Custom Composer fonts are to be ordered on the DCO with a Special Type Order form attached. Two categories are applicable:

- A. Those ordered as additional or ordered to replace a custom font on a unit which is not under Maintenance Agreement. These typing elements are to be invoiced in full by the Lexington Plant from a DCO.
- B. Those ordered to replace a broken font on a lease or rental machine or on a Maintenance Agreement machine. The Lexington Plant will issue a miscellaneous invoice to OPD HQ for write-off to the cost of rentals or Maintenance Agreement parts. A copy of the invoice marked "No Charge" is sent to the customer as a notification of the shipment of the element.

**NOTE:** Separate order forms must be submitted to the plant to order different type style custom fonts, F/N 140-3379.

Type fonts for the "Selectric" Composer are charged to Type Font Account 0122.
